

# Aluminum Rafter Square

This is an aluminum rafter square with laser etched markings for high visibility. The solid aluminum body features CNC machined edges for greater accuracy and durability.

## Product Overview

### Professional Grade Rafter Square

This aluminum rafter square is designed for high-precision carpentry, roofing, and framing applications. Engineered with a solid aluminum body and CNC-machined edges, it provides superior accuracy and long-term durability on the job site. The laser-etched markings ensure high visibility for quick and reliable measurements.

## Technical Specifications

Construction Material	Solid Aluminum
Machining Technique	CNC Machined
Measurement Markings	Laser Etched

## Applications

Primary Applications	Carpentry, Roofing, Framing, General Layout
