

# Aluminum Stovetop Pressure Cooker

This aluminum pressure cooker is designed for efficient and safe cooking. It features a durable construction, secure locking mechanism, and easy-to-use pressure release valve.

## Product Overview

### Professional Aluminum Pressure Cooker

This high-performance aluminum stovetop pressure cooker is engineered for efficiency and durability in professional kitchen environments. Constructed from a high-grade aluminum alloy with a polished finish, it offers excellent heat conductivity and long-lasting resilience. The unit is equipped with a comprehensive multi-stage safety system, including automatic locking and multiple pressure release valves, ensuring reliable operation under high-pressure conditions.

## Technical Specifications

### Working Pressure

**50 Kpa**

Working Pressure

### Model Specifications

Model	Diameter	Capacity
FPC-18	18CM	3.0L
FPC-20	20CM	4.0L
FPC-22	22CM	5.0L
FPC-24	24CM	7.0L
FPC-26	26CM	9.0L
FPC-28	28CM	11L

## Safety & Construction

### Safety Mechanisms

- Automatic safety device for opening and closing
- Spring valve
- Alarm valve
- Pressure limit valve
- Safety outlet in cover for excessive pressure release

### Customization Options

Induction Base • Soft Anodized Surface

### Material & Finish

Aluminum Alloy, Polished Surface
