Product Overview

High-Performance ABC Suspension System

This aluminum suspension bracket and tension clamp assembly is engineered for robust performance in aerial bundled cable (ABC) installations. Designed for high electric power transmission and distribution networks, it provides secure, reliable support for overhead lines. The high-quality aluminum construction ensures excellent corrosion resistance and long-term durability in diverse outdoor environments.

Technical Specifications

Reliable and secure overhead power line installation for ABC applications.

Material	High-quality Aluminum
Application	Aerial Bundled Cable, Overhead Power Lines, Transmission Networks, Distribution Networks
