

Aluminum Tube Caulking Gun

This pneumatic caulking gun is designed for dispensing sealants and adhesives from aluminum tubes. It features a zinc alloy handle with a vent needle, hardened round rod, and aluminum locking nuts.

Product Overview

Professional Aluminum Tube Caulking Gun

These aluminum tube caulking guns are designed for professional applications, featuring durable zinc alloy handles with integrated vent needles for ease of use. Equipped with hardened round rods, front and rear aluminum locking nuts, and powder metallurgy actuators, these tools ensure reliable performance and longevity. Multiple capacity options are available to suit various project requirements.

Technical Specifications

Key Features

- Integrated vent needle in handle
- Hardened round rod
- Front and rear aluminum locking nuts
- Ergonomic design

Key Materials

Aluminum Tube, Zinc Alloy Handle, Powder Metallurgy Actuator
