

Aluminum Tube Fin Evaporator for Refrigerators

This fin type evaporator is constructed with aluminum tubes for use in refrigerators and ice boxes. The aluminum tube construction ensures durability and resistance to corrosion, while the fin design maximizes surface area for enhanced heat exchange.

Product Overview

High-Efficiency Aluminum Fin Evaporator

This fin-type evaporator is engineered specifically for refrigerators and ice boxes to facilitate superior heat transfer. Constructed with durable aluminum tubing, it offers excellent corrosion resistance and long-term reliability. The specialized fin design maximizes surface area, ensuring enhanced heat exchange and consistent, efficient cooling performance for a variety of refrigeration applications.

Technical Specifications

Design Features

- Fin-type construction for increased surface area
- Aluminum tube design
- Corrosion-resistant materials
- Optimized for heat exchange

Material	Aluminum
Compatible Applications	Refrigerators, Ice Boxes
