

American Type Bicycle Tube Valve

This bicycle tube valve features a threaded brass stem for secure pump connection. It includes a removable valve core and protective cap for reliable air retention.

Product Overview

American Type Bicycle Tube Valve

This American-type bicycle tube valve is engineered for durability and reliable performance in standard bicycle applications. Featuring a high-quality threaded brass stem, it ensures a secure and airtight connection for consistent inflation. The design includes a removable valve core and a protective cap to maintain air retention and prevent contamination during use.

Technical Specifications

Valve Standard	American Type
Stem Material	Brass
Key Features	Threaded Stem, Removable Core, Protective Cap

Compatibility

Compatibility	Standard bicycle rims and tubes
