

# Android TV Stick with HDMI

This compact device plugs into a TV via HDMI. It provides smart TV functionality, such as streaming, app access, and media playback.

## Overview

### Smart Media Solution

This compact Android TV stick transforms any standard display with an HDMI port into a fully functional smart media center. Featuring a slim, portable design with integrated cooling, it is engineered for seamless streaming and application access. Its intuitive interface and plug-and-play capability make it an ideal solution for upgrading legacy displays to modern smart standards.
