

Angle Grinder Armature BOS-100

Armature compatible with BOS series angle grinders designed for 100mm grinding wheels. It is suitable for models GWS 6-100 and 6-100E.

Product Overview

High-Performance Angle Grinder Armature

The BOS-100 armature is a precision-engineered component designed for high-efficiency energy transfer in power tools. Specifically built for angle grinders utilizing 100mm grinding wheels, it ensures optimal performance and reliability during intensive grinding applications. This component serves as a critical replacement part to maintain the operational integrity of professional-grade equipment.

Technical Specifications

Grinding Wheel Diameter

100 mm

Wheel Diameter

Primary Application

Power Tool Maintenance • Energy Transfer • Grinding Applications

Component Type

Armature

Compatibility

Compatible Models

- GWS 6-100
- GWS 6-100E

Tool Series Compatibility

Angle Grinders, 100mm Series
