

# Angle Grinder for Cutting and Polishing

This angle grinder is designed for cutting, grinding, and polishing tasks. It features a powerful motor and durable construction suitable for metalworking and DIY projects.

## Product Overview

### Professional Performance

This robust angle grinder is engineered for versatile cutting, grinding, and polishing applications. Equipped with a powerful 1200W motor, it delivers efficient material removal and consistent results in demanding environments. Its durable construction ensures long-lasting performance, making it an ideal choice for metalworking, construction, and intensive DIY projects.

## Technical Specifications

Rated Power Input	1200 W
Rated Speed	11800 r/min
Max Wheel Diameter	125 mm
Hole Diameter of Wheel	22 mm
Net Weight	3 Kg
