

Angle Stop Valve with Compression Fitting

This angle stop valve is designed for plumbing applications. It features a brass body and a chrome-plated finish, along with a compression fitting for simple installation.

Product Overview

Professional Grade Angle Stop Valve

This high-quality angle stop valve is designed for reliable flow control in various plumbing applications, including sinks, toilets, and dishwashers. Featuring a durable brass body with a premium chrome-plated finish, it provides excellent resistance against corrosion and wear. The integrated compression fitting ensures a straightforward and secure installation for professional plumbing projects.

Technical Specifications

Product Highlights
