Product Overview

High-Performance Angle Valve

This angle valve is engineered for precise flow control in demanding plumbing and HVAC environments. Constructed from durable, corrosion-resistant materials, it ensures long-lasting performance and reliable shut-off capabilities. With a smooth, quarter-turn handle, it offers easy operation and accurate adjustments for residential, commercial, and industrial applications.

Technical Specifications

Key Features

- Corrosion-resistant construction
- Smooth quarter-turn operation
- Precise flow control
- Standard threaded connections

Product Code	Y00551
Size Specification	1/2" x 1/2"
Compatible Applications	Plumbing, HVAC, Residential, Commercial, Industrial

Manufacturing Standards

Manufacturing Values

Green Manufacturing • Quality Guaranteed • Cost Efficient
