

Angled Compression Lug for 70mm Aluminum to Copper Cable

Angled compression lug designed for terminating 70mm² aluminum connectors to copper cables. It features a two-hole design for secure connections in electrical power transmission and distribution.

Product Overview

Angled Compression Lug Description

This high-quality angled compression lug is specifically engineered for the termination of 70mm² aluminum conductors to copper cables. Featuring a durable two-hole mounting configuration, it ensures a secure, reliable electrical connection suitable for demanding power transmission and distribution environments. Its robust construction provides excellent conductivity and superior corrosion resistance.

Technical Specifications

High-quality compression lug featuring an angled barrel for optimal cable entry and a secure two-hole mounting configuration.

Compatible Cable Size	70 mm ²
Mounting Configuration	2-hole
Connector Type	Angled Compression Lug
Material	Aluminum
Applications	Power Transmission, Distribution Systems, Electrical Fitting

Certifications & Standards

Compliance

CE • ISO 9001
