Product Overview

Efficient Soil Preparation

The 1L-112A is a robust, animal-drawn agricultural plow designed for essential soil cultivation. Featuring a sharp, angled blade and adjustable depth control, this implement efficiently turns and breaks up soil to prepare fields for planting. Its durable construction includes a stabilizing wheel and ergonomic handles, ensuring consistent depth and precise control for small to medium-sized farming operations.

Technical specifications overview for the 1L-112A model.

Working Width

120 mm

Minimum Width

180 mm

Maximum Width

Model	1L-112A
Number of Bottoms	1
Working Depth	150 mm
Weight	30-35 kg

Operational Features

Power Source

Animal Drawn

Key Features

- Adjustable depth control
- Integrated stabilization wheel
- Ergonomic handle design
- Robust frame construction

Hitch Type

Trailed
