Product Overview

High-Performance Aluminum Extrusions

These custom aluminum profiles are manufactured from high-quality 6063 aluminum alloy, engineered to provide an optimal balance of strength and versatility. Featuring a durable anodized finish, these extrusions offer superior corrosion resistance and a refined aesthetic suitable for both structural and decorative applications. They serve as reliable components for building material machinery and various industrial projects requiring precise dimensions.

Material & Finish

Surface Finish

Anodized • Corrosion Resistant

Alloy Grade

6063 Aluminum Alloy

Application & Use

Customization

- Custom Profiles
- Various Shapes
- Multiple Finishes
- Range of Colors

Primary Applications

Decorative, Structural, Building Material Machinery, Industrial Components
