

ANSI 125 Non-Rising Stem Gate Valve

This ANSI 125 Non-Rising Stem Gate Valve is engineered for reliable shutoff and flow control in various fluid systems. Its robust construction is designed to withstand demanding operating conditions, while the non-rising stem design is suitable for applications where space is limited.

Overview

Industrial Gate Valve Solution

The ANSI 125 Non-Rising Stem Gate Valve is engineered for reliable shutoff and flow control in diverse industrial fluid systems. Its robust construction ensures durability under demanding operating conditions. The non-rising stem design is specifically optimized for installations where space is limited, providing a compact and efficient solution for piping infrastructure.

Technical Specifications

Valve Type	Non-Rising Stem Gate Valve
Size Range	2" - 12"
Standards	ANSI 125
