

ANSI 125 Pullback Weight Check Valve

This ANSI 125 pullback weight check valve prevents backflow in piping systems. The valve features a flanged connection conforming to ANSI 125 standards and a weight-actuated check mechanism.

Product Overview

Product Overview

The ANSI 125 Pullback Weight Check Valve is a robust industrial valve designed to effectively prevent backflow in piping systems. Featuring a flanged connection that conforms to ANSI 125 standards, it ensures seamless compatibility with a wide range of industrial applications. Its weight-actuated mechanism automatically closes the valve upon detecting reverse flow, while the pullback design facilitates easy maintenance and inspection.

Technical Specifications

Size Range	2" - 12"
Standard	ANSI 125
Valve Type	Check Valve (Pullback Weight)

Compatibility

Suitable Media	Water, Oil, Gas
----------------	-----------------

Key Features

Design Benefits

- Weight-actuated automatic closure
- Pullback design for easy maintenance
- Flanged connection for standard compatibility
- Durable construction for long service life
