

ANSI 125 Screw Type Check Valve

The ANSI 125 Screw Type Check Valve is designed to prevent backflow in piping systems. With a robust body and screw-type connection, this valve ensures reliable performance and easy installation.

Product Overview

Reliable Backflow Prevention

The ANSI 125 Screw Type Check Valve is engineered to effectively prevent backflow in critical piping systems. Featuring a robust construction, this valve ensures long-term durability and consistent performance in industrial and commercial environments. Its screw-type connection design facilitates straightforward installation and simplified maintenance procedures, helping to maintain system integrity.

Technical Specifications

Standard
ANSI 125

Size Range

2" - 4"

Valve Type

Screw Type Check Valve
