

ANSI 250 Swing Check Valve

This ANSI 250 swing check valve prevents backflow in piping systems. The valve is constructed from durable materials, ensuring long-lasting performance in demanding industrial applications.

Overview

ANSI 250 Swing Check Valve

The ANSI 250 Swing Check Valve is a robust and reliable solution engineered to prevent backflow in critical piping systems. Featuring a swing-type disc design, it ensures unrestricted flow with minimal pressure drop while providing positive shut-off during back pressure events. This valve is designed for demanding industrial environments, making it an ideal choice for chemical processing, power generation, and water treatment facilities.

Technical Specifications

Pressure Rating

ANSI Class 250

Available Sizes

2" - 8"

Connection Type

Flanged

Material Options

Cast Iron, Carbon Steel, Stainless Steel

Application

Compatible Fluids

- Water
- Oil
- Gas

Primary Industries

Chemical Processing, Power Generation, Water Treatment
