

Anti-Rust Penetrating Lubricant

This anti-rust lubricant is designed to penetrate and dissolve rust, providing lubrication for mechanical components. The formulation ensures effective rust removal and protection against future corrosion.

Product Overview

Professional Grade Penetrating Lubricant

This versatile anti-rust lubricant is engineered to penetrate and dissolve rust, effectively restoring mechanical components. It serves a dual purpose by cleaning and lubricating parts, making it an essential maintenance solution for vehicles, ships, industrial machinery, and various tools. Regular application helps prevent future corrosion and significantly reduces operational noise, extending the lifespan of treated equipment.

Technical Details

Net Content	280 g

Applications

Suitable Applications	Automotive, Marine, Industrial Machinery, Household Tools
-----------------------	---

Performance Features

Key Benefits

- Rust penetration and removal
- Lubrication of mechanical parts
- Cleaning of surfaces
- Corrosion prevention
- Noise reduction during operation
