

Anti-Static Webbing Sling

This webbing sling is designed with anti-static properties for use in sensitive environments. It prevents static electricity build-up during lifting, protecting sensitive equipment.

Product Overview

Professional Anti-Static Lifting Solution

This specialized coated polyester webbing sling is engineered for environments where static electricity poses a risk to sensitive cargo. Unlike standard slings, this conductive design safely discharges static buildup to prevent damage to highly sensitive electrical or electronic components. It is the ideal choice for high-precision operations such as missile and satellite handling, offering reliable strength and safety.

Technical Specifications

Operating Parameters

Feature	Specification
Drive Type	AC
Running Mode	Haulage
Structure	Hook Crane
Work Level	Middle-Level

Material Characteristics

Polyester, Anti-static, Insulating, Conductive

Key Benefits

Advantages

- Wide loading surface reduces pressure per point
- Protects tender objects from damage
- High strength-to-weight ratio
- Optional anti-abrasion and anti-incision protective sleeves
- Supports various loading methods

Customization

Yes
