

Anti-Theft Mobile Phone Display Holder

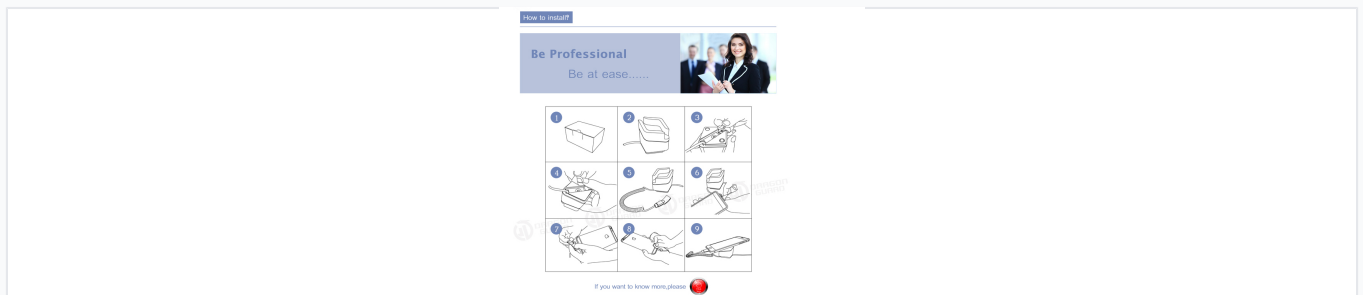

This anti-theft display holder is designed to protect mobile phones and other small electronics from theft. It features a secure locking mechanism and durable construction.

ADDITIONAL IMAGES

Overview

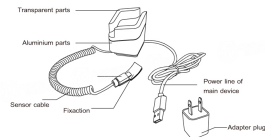

Easy multi-step installation process for retail display setup.

Professional Retail Security Solution

This anti-theft mobile phone display holder is engineered to provide high-level security for smartphones in retail environments. It combines a durable mechanical tether with an integrated charging system, allowing customers to fully interact with devices while ensuring they remain protected. Designed for high-traffic areas, it offers a clean, modern aesthetic that enhances product presentation without compromising safety.

Technical Specifications

Notification: When you want to change the installation position, please make sure to hold it at the aluminium parts, not the transparent parts.

Detailed view of the aluminum and transparent components, sensor cable, and power adapter.

Unit Dimensions
