

Anvil Loppers for Tree Pruning

These heavy-duty anvil loppers are designed for cutting thick branches. They feature a high-carbon steel blade for lasting sharpness, with long handles to increase leverage and reduce strain.

Product Overview

Heavy-Duty Anvil Loppers

These heavy-duty anvil loppers are engineered for efficient tree and shrub pruning. Featuring a high-carbon steel blade, they provide long-lasting sharpness and reliable performance. The anvil cutting action ensures clean cuts that minimize plant damage, while the extended handle design delivers superior leverage to reduce user strain. Designed for comfort and control, these loppers are an essential tool for demanding garden maintenance tasks.

Technical Specifications

Blade Material	High-carbon steel
Cutting Action	Anvil
Primary Applications	Tree Pruning, Shrub Maintenance, Garden Maintenance

Design Features

Ergonomic Features

- Long handles for increased leverage
- Comfortable non-slip grips
- Reduced strain design
