

API Cast Steel Gate Valve

This industrial gate valve is designed for on-off control of fluid flow. Constructed from durable cast steel, it is suitable for use in oil fields, chemical industries, and coal mines.

Overview

Industrial API Cast Steel Gate Valve

This industrial gate valve is engineered for precise on-off control of fluid flow in demanding pipeline systems. Constructed from durable cast steel, the valve adheres to API standards to ensure reliable performance and compatibility across diverse industrial applications. Its robust design is specifically built to withstand high-pressure and high-temperature environments, making it a dependable choice for water, oil, and gas media.

Technical Specifications

Pressure Class

150 lb

Class

Valve Type	Gate Valve
Construction Material	Cast Steel (WCB)
Nominal Size	8 inch
Connection Type	Flanged (RFSE)

Application

Environment Suitability

High Pressure • High Temperature

Compatible Media	Water, Oil, Gas
