

API Standard Ball Valve

This API ball valve is designed for industrial applications requiring reliable flow control. Its robust construction features flanged connections for secure installation in piping systems.

Product Overview

API Standard Ball Valve

This API standard ball valve is engineered for industrial applications requiring reliable and precise flow control. Featuring a robust construction with secure flanged connections, it is designed to withstand demanding operating conditions while ensuring efficient performance. Its user-friendly design facilitates easy operation and maintenance, helping to minimize downtime and enhance overall system productivity.

Technical Specifications

Standard

API

Size Range

1/2" - 12"

Material Grade

WCB

Pressure Class

150 LB
