

API Standard Swing Check Valve

This industrial swing check valve prevents backflow in pipelines. It features flanged connections for secure installation in various industrial applications requiring reliable flow control.

Overview

API Standard Swing Check Valve

This industrial swing check valve is engineered to provide reliable backflow prevention in demanding pipeline systems. Designed to adhere to strict API standards, it ensures consistent performance, safety, and durability in various industrial applications. The robust construction and flanged connections facilitate secure installation, making it an essential component for effective flow control.

Technical Specifications

Material Markings

- W.C.B

Pressure Class

300 LB

Class Rating

Size Range

2" - 28"

Valve Type

Swing Check Valve
