

Appliance Replacement Filter Set

This set contains replacement filters for blenders, coffee makers, and juicers. The filters are designed to remove impurities and sediment to maintain appliance performance.

Product Overview

Comprehensive Filtration Solution

This versatile replacement filter set is engineered for a wide range of household appliances, including blenders, coffee makers, and juicers. By effectively removing impurities and sediment, these filters help ensure optimal appliance performance and contribute to a longer operational lifespan. The collection features a diverse array of materials and shapes, providing a tailored filtration solution for various maintenance needs.

Technical Specifications

Filter Materials

- Foam
- Activated Carbon
- Synthetic Fibers

Primary Function

Impurity Removal • Sediment Filtration • Performance Maintenance

Compatible Appliances

Blenders, Coffee Makers, Juicers
