Product Overview

High-Efficiency Spin Motor

This robust spin motor is specifically engineered for twin tub washing machines, ensuring reliable rotational performance. Designed with a durable metal housing featuring integrated ventilation for optimal cooling, it is built to withstand the rigors of frequent use in domestic appliance environments. Our engineering team provides flexible design services, allowing for custom specifications to meet your exact technical requirements.

Technical Specifications

Design Features

- Robust metal housing
- Ventilation holes for thermal management
- High-torque rotational shaft
- Universal compatibility design

Primary Application	Twin Tub Washing Machine, Household Appliance
Customization Capability	Yes
