Product Overview

High-Efficiency Appliance Spin Motor

This versatile spin motor is engineered for use in a wide variety of ventilators, exhaust fans, and essential household appliances. Built with over two decades of manufacturing expertise, the motor offers a robust design with a metallic finish, ensuring long-term reliability and efficient rotational performance. It supports flexible customization options regarding performance, size, and color to meet specific integration requirements for various appliance assemblies.

Technical Specifications

Operating Performance Range

Voltage (V)	Frequency (Hz)	Output Power (W)	Rotation Speed (RPM)
110	50	40-180	1350-1650
110	60	40-180	1350-1650
220	50	40-180	1350-1650
220	60	40-180	1350-1650
230	50	40-180	1350-1650
240	50	40-180	1350-1650

Product Features

Compatible Applications

- Ventilator Fans
- Exhaust Fans
- Washing Machines
- Kitchen Appliance Accessories

Key Features

Customizable Design, Metallic Construction, Integrated Cooling, Wide Voltage Support
