

Aquaculture Paddle Wheel Aerator

This paddle wheel aerator is available in 1HP and 2HP power options. It comes in 2-impeller and 4-impeller configurations and is widely used to deliver oxygen to farming ponds.

Product Overview

High-Efficiency Aeration Solution

This paddle wheel aerator is specifically engineered to optimize oxygen levels in aquaculture environments, such as fish and shrimp farms. Designed for durability and performance, it features a robust frame with buoyancy-enhancing pontoons to ensure stable operation. Available in multiple power and impeller configurations, it provides a reliable solution for maintaining water quality and supporting aquatic life health.

Technical Specifications

Impeller Sets

- 2 Impeller Set
- 4 Impeller Set

Power Options

1HP, 2HP

Applications

Suitable Environments

Fish Farming • Shrimp Farming • Aquaculture

Primary Use

Oxygen delivery in farming ponds
