Product Overview

High-Performance Aramid Protection

These Aramid fiber safety gloves are engineered to provide exceptional cut, abrasion, and heat resistance for demanding industrial environments. Featuring a durable knitted design with PVC dots for enhanced grip, they offer a balance of dexterity and protection. They are an essential safety solution for professionals working in high-risk sectors such as glass handling, automotive assembly, and metalworking.

Technical Specifications

Material	100% Aramid Fiber with PVC dots
Length	24 cm
Size	One size fits all
Color Options	Yellow with yellow dots, Yellow with blue dots

Compliance & Safety

Standards

EN388 254X • EN407

Application

Suitable Industries

- Glass industry
- Automotive assembly
- Metalworking
- Construction
- High-risk industrial environments

Performance Features

Core Features

1 High

Cut Resistance

1 Yes

Heat Resistance

1 High

Abrasion Resistance
