

Arc Glazed Tile Roll Forming Machine

This metal forming machine is designed for efficient production of arc-shaped glazed tiles. Its automated system ensures consistent quality and high production rates.

Product Overview

828 Arc Glazed Tile Roll Forming Machine

The 828 Arc Glazed Tile Roll Forming Machine is a specialized industrial solution designed for the efficient, high-volume production of arc-shaped glazed tiles. Featuring a robust, durable frame and precision-engineered rollers, this machine ensures consistent shaping of metal sheets into complex tile profiles. It includes an integrated control cabinet for precise process monitoring, offering versatility for various metal thicknesses and designs in large-scale manufacturing environments.

Technical Specifications

Model Designation	828 Arc Glazed Tile Roll Forming Machine
Forming Process	Roll Forming
Key Features	Automated System, Precision Rollers, Arc Tile Profile, Integrated Control Panel

Construction & Design

Frame Finish	Blue • Red
Build Quality	Robust construction designed for stability during high-speed operation
