

Arc MMA Welder Inverter DC Welding Machine

This is a professional-grade welding machine designed for MMA (Manual Metal Arc) welding. The compact and portable inverter-based machine delivers a stable and reliable DC welding current, making it suitable for various welding applications.

Overview

Professional DC Welding Solution

This Arc MMA Welder Inverter DC Welding Machine is a compact and portable tool designed for reliable performance in various welding applications. Featuring advanced inverter technology, it delivers a stable DC current and is engineered to handle non-professional power grids with ease. With adjustable controls for hot start and arc force, it ensures optimized welding performance for both standard and demanding tasks.

Key Features

Compatibility

- Suitable for various types of welding rods
- Compatible with non-professional power grids

Capabilities

High No-Load Voltage, Wide Voltage Input Range, Adjustable Hot Start, Adjustable Arc Force

Technical Specifications

Safety Systems

Thermal Overload Protection

Welding Type

MMA (Manual Metal Arc)

Power Technology

Inverter DC
