

ARC315 Industrial Welding Machine

This is a high-performance ARC welding machine designed for industrial applications. It features robust construction and adjustable current control for reliable operation.

Overview

Industrial Welding Power

The ARC315 is a high-performance welding machine engineered specifically for demanding industrial environments. It features precise adjustable current control and a clear digital display to ensure consistent weld quality across a variety of tasks. Built with robust construction, this unit provides the reliability and durability required for intensive, professional-grade welding applications.

Technical Specifications

Rated Current

315 A

Max Current

Model Number

ZX7-315

Key Features

Digital Display, Adjustable Current Control, Robust Construction, Industrial Grade
