

Arched Aluminum Mesh Loading Ramp

This arched aluminum mesh ramp is designed for loading wheeled equipment into trucks or trailers. The lightweight aluminum construction features a high-traction mesh surface and includes safety straps for secure loading and folds for compact storage.

Product Overview

Arched Aluminum Mesh Loading Ramp

This heavy-duty arched aluminum mesh ramp is engineered for the efficient loading of ATVs, motorcycles, and other wheeled equipment into trucks or trailers. Its lightweight yet durable aluminum construction ensures long-lasting reliability, while the specialized arched design offers increased clearance to prevent bottoming out. Featuring a high-traction mesh surface, this ramp provides secure loading performance across various weather conditions and includes safety straps for stable attachment.

Technical Specifications
