

# Armature for 110mm Circular Saws

This armature is designed for circular saws. It is compatible with models using a 110mm cutting wheel.

## Product Overview

### High-Performance Replacement Armature

This high-quality armature is specifically designed for 110mm circular saws, providing a reliable core component for power tool maintenance and repair. It is engineered to match the technical requirements of compatible circular saw models, ensuring efficient power transmission and motor performance. Ideal for professional repair services and industrial maintenance, this component helps extend the service life of heavy-duty cutting equipment.

## Technical Specifications

### Compatible Cutting Wheel Diameter

**110 mm**

Wheel Diameter

### Compatible Tool Type

Circular Saws

## Compatibility

### Reference Compatibility

- 4100 Series
- 41 DONH

### Applications

Power Tool Parts, Motor Components, Circular Saw Repair
