

Arrowhead Cultivator Tiller Blade

The Arrowhead Cultivator Tiller Blade is a durable and efficient gardening tool designed for cultivating and tilling soil. Its arrowhead shape allows for precise and effective soil penetration, making it ideal for breaking up compacted soil, removing weeds, and preparing seedbeds.

Product Overview

Versatile Soil Cultivation

The Arrowhead Cultivator Tiller Blade is a durable and efficient gardening tool engineered for professional soil management. Featuring a unique arrowhead geometry, this blade ensures precise penetration to effectively break up compacted soil, eliminate weeds, and prepare optimal seedbeds. Crafted from high-quality steel, it is built to withstand varied soil conditions while maintaining its edge for consistent productivity.

Technical Specifications

Construction Material	High-quality steel
Mounting Interface	Square opening
Product Highlights	High Strength, Soil Penetration, Weed Removal, Seedbed Preparation

Performance

Operational Capabilities

- Effective breaking of compacted soil
- Efficient weed removal
- Smooth and consistent soil turning
- Secure stability during operation
