

Art Design Utility Knife

This manual utility knife is designed for art and design applications. It features a segmented blade that can be extended and retracted for controlled cutting.

Product Overview

Precision Art and Design Tool

The Art Design Utility Knife is a manual cutting tool specifically engineered for high-precision art and design applications. It features a segmented blade system that allows for adjustable extension and retraction, ensuring controlled and accurate cuts every time. Designed with a comfortable grip for extended use, it is the ideal choice for professionals and hobbyists working with paper, cardboard, and other thin crafting materials.

Design & Ergonomics

Blade Mechanism	Segmented retractable blade for adjustable cutting depth
