Overview

High-Capacity Urban Transit Solution

The ZK6180HGC is a premium articulated low-floor city bus engineered for high-capacity urban transportation demands. Its design prioritizes passenger accessibility and efficient flow, making it an ideal choice for modern transit infrastructure. Built for durability and reliability, this vehicle combines a powerful diesel powertrain with advanced climate control systems to ensure consistent performance in busy city environments.

Physical Dimensions

Dimensions & Weight

18000 mm

Length

2550 mm

Width

3150 mm

Height

28000 kg

Max Weight

Powertrain

Engine Performance

Parameter	Value
Model	D2066LOH12
Displacement	10.5 L
Max Power	257 kW @ 1900 rpm
Max Torque	1750 Nm @ 1000-1400 rpm
Fuel Type	Diesel

Drivetrain

ZF6HP604C Transmission, 6-Speed Automatic, Air Suspension, Euro III Standard

Interior & Comfort

Passenger Capacity	42
Air Conditioning Power	52000 kcal/h
Audio & Video	MP3 player
