

Articulated Telescopic Boom Lift

This articulated mobile elevating work platform is designed for versatile aerial access. It features a telescopic boom for extended reach and precise positioning.

Overview

Versatile Aerial Access Solution

The XGA20AC mobile elevating work platform is engineered with a compact structure, offering high load capacity and robust driving performance. Designed for both indoor and outdoor environments, it features a telescopic boom for precise positioning and extended reach. With long battery life and an emphasis on energy efficiency, this platform provides a reliable and environmentally conscious solution for construction, maintenance, and installation tasks.

Performance

Key Advantages

- Compact structural design
- High load capacity
- Long battery life
- Energy saving and environmentally friendly

Power Source	Battery-powered
Suitable Environments	Indoor, Outdoor

Design

Boom Type	Articulated Telescopic
