

Articulated Wheel Loader

This wheel loader is a heavy-duty construction machine designed for efficient material handling. It features articulated steering for maneuverability in confined spaces, making it suitable for construction sites, mining operations, and landscaping projects.

Product Overview

High-Efficiency Articulated Loader

This heavy-duty articulated wheel loader is designed for high-performance material handling in demanding environments. Featuring a robust hydraulic system and a large-capacity bucket, it excels at scooping and transporting soil, gravel, and debris. Its articulated steering mechanism provides superior maneuverability in confined spaces, making it an ideal choice for construction sites, mining, and landscaping projects.

Technical Specifications

Steering System	Articulated
Model Series	948

Key Performance Metrics

Engine Power Output

40 kW

Power Rating

Features

Operator Comfort & Safety	Enclosed Cabin, Robust Hydraulics, Durable Tires
