

# Artificial Stone Abrasive Set

This abrasive set is designed for processing artificial stone. It includes grinding wheels, Frankfurt abrasives, Fickert abrasives, chamfering wheels, and polishing pads.

## ADDITIONAL IMAGES

## Product Overview

### Professional Artificial Stone Abrasives

This comprehensive abrasive set is specifically engineered for the processing of artificial quartzite and granite. Designed for use on automatic polishing and grinding machines, the collection covers the entire workflow from surface calibration to final edge polishing. These tools are renowned for their exceptional sharpness, non-staining properties, and ability to deliver a high-gloss finish consistently.

## Application & Compatibility

### Suitable Machinery

- Automatic Polishing Machines
- Grinding Machines
- Automatic Chamfering Machines

### Compatible Materials

Artificial Quartzite, Artificial Granite

## Technical Features

### Key Performance Benefits

Good Sharpness • Excellent Abrasiveness • Non-staining • High Glossiness • Stable Quality

## Tool Types

### Surface Grinding Tools

- Diamond Circular Grinding Wheel
- Diamond Frankfurt
- Diamond Fickerts

### Edge Processing Tools

- Chamfering Wheel
- Honeycomb Polishing Pad
- Flexible Polishing Pad
