

Aseptic Brick Bag Filling Machine

This aseptic filling machine is designed for packaging liquid products into brick-shaped bags. It features a fully automated process, including bag forming, filling, and sealing, all performed under sterile conditions.

Overview

Aseptic Brick Bag Filling Machine

This high-speed aseptic filling machine is engineered for the precise packaging of liquid food products into brick-shaped bags. Utilizing advanced sterilization technology, it ensures optimal product safety and significantly extended shelf life for sensitive liquids. The system features a fully automated process encompassing bag forming, filling, and sealing, all constructed from high-grade stainless steel for maximum hygiene and durability.

Technical Specifications

Material Construction

Stainless Steel

Automation Capabilities

- Automatic Feed
- Sterilization
- Filling
- Molding
- Packaging

Suitable Applications

UHT Milk, Fruit Juice, Coffee, Vegetable Protein Drinks, Tea Drinks, Wine

Sterilization Type

Gravity sterilization

Key Features

System Highlights

1 Grade

Sterile Environment

100 % World-Class
