

Asphalt and Concrete Road Cutting Machine

This asphalt and concrete road cutting machine is engineered for precise and efficient cutting. It is designed for road construction, pavement maintenance, and repair projects.

ADDITIONAL IMAGES

Product Overview

Compact design allows for flexible operation on various road surfaces.

Professional Road Cutting Solution

This road cutting machine is engineered for precision and efficiency in both asphalt and concrete pavement maintenance. Its compact, lightweight design ensures flexible operation on job sites, while the integrated circular locator allows for quick positioning. Operators can precisely adjust the cutting radius to meet specific project requirements, making it an ideal tool for road repairs, expansion joint cutting, and utility installation.

Operational Features

Key Features

Compact Structure, Lightweight Design, Adjustable Cutting Radius, Quick Positioning, Flexible Operation

Technical Specifications

Equipped with a gasoline engine and water cooling system for sustained performance.

Safety Equipment

Blade Guard • Emergency Shut-off

Power Source	Gasoline Engine
Cooling System	Yes
Dust Suppression	Yes

Applications

Designed for precise and efficient cutting of asphalt and concrete pavements.

Primary Applications

- Asphalt Road Repair
- Concrete Pavement Cutting
- Expansion Joint Cutting
- Utility Installation
- Demolition Projects
