

Asphalt and Concrete Road Milling Machine

This road milling machine is designed for asphalt and concrete pavement milling. It features a robust milling drum with replaceable cutting tools for precise removal of pavement layers.

Product Overview

Professional Pavement Milling Solution

This 1,000mm wide wheel milling machine is engineered for the efficient removal and stripping of pavement from urban roads and highways of all grades. Designed for versatility, it excels in small-scale operations for expressways, airport runways, and port areas, as well as the texturing of cement surfaces. With a robust hydraulic system and a 300mm maximum milling depth, it delivers consistent performance for demanding road maintenance and repair projects.

Technical Specifications

Milling Width

1000 mm

Milling Width

Max Milling Depth

300 mm

Operational Features

Ideal Applications

- Urban road repairs
- Expressway maintenance
- Airport runway stripping
- Port and harbor pavement removal
- Cement road texturing

Steering and Mobility

Front wheel steering, Two rear pillar lift-lower system
