

Asphalt Plant Mixer Blade

This mixing blade is engineered for optimal material blending in asphalt plants. It is constructed from durable materials to withstand abrasive conditions and high temperatures, ensuring a long service life.

Product Overview

High-Performance Mixing Components

These professional-grade mixing blades are engineered specifically for asphalt plant applications, designed to withstand high-temperature and abrasive environments. Built for durability and consistent material blending, these components provide reliable performance to ensure uniform asphalt production. Our replacement parts are crafted to meet rigorous industrial standards for wear resistance and operational longevity.

Product Details

Available Spare Parts

- Mixing arm
- Mixing blade
- Mixing scraper
- Mixing spacer
- Liner plate
- Sealing parts

Component Type	Asphalt Plant Wear Parts
Customization	Sample-based development, Drawing-based design, New model development

Performance & Quality

Key Features

High Wear Resistance • Heat Resistant • Precision Engineered

Manufacturing Experience	10 years
---------------------------------	----------
