

Assorted Hardware Components

This collection features assorted hardware components including wires, valves, hinges, bolts, nails, locks, and fencing materials. The collection includes various types of metal wires, an assortment of brass and stainless steel valves, and a selection of hinges in various sizes and finishes.

Product Overview

Comprehensive Hardware Selection

This collection offers a versatile range of hardware components essential for construction, repair, and assembly projects. The assortment includes critical items such as fasteners, valves, hinges, and security hardware, catering to both professional contractors and industrial maintenance needs. With a variety of materials and finishes available, these components are designed to provide reliable performance across diverse applications.

Components & Materials

Included Components

- Metal wires (various gauges/colors)
- Valves (brass and stainless steel)
- Hinges (various sizes/finishes)
- Bolts and screws (various head types/lengths)
- Common nails
- Mortise locks
- Fencing and mesh

Component Variety

Fasteners • Plumbing • Security • Structural

Material Types

Brass, Stainless Steel, Metal
