

Assorted Washer and Gasket Set

This assortment includes both flat washers and gaskets of varying sizes. The fasteners are typically used to distribute the load of a threaded fastener or to seal a joint to prevent leakage.

Product Overview

Comprehensive Fastener Assortment

This versatile set features a wide range of flat washers and gaskets designed to meet diverse mechanical needs. These fasteners are essential for distributing the load of threaded bolts and screws, as well as creating reliable seals to prevent leakage in various joints. With sizes ranging from small to large, this collection provides the necessary components for a variety of assembly and repair applications.
