

Astronomical Refractor Telescope with Tripod

This refractor telescope is designed for astronomical observation and detailed terrestrial viewing. The robust tripod ensures stability, minimizing vibrations for optimal image quality.

Product Overview

Professional Astronomical Refractor Telescope

This high-quality refractor telescope is engineered for both astronomical observation and detailed terrestrial viewing. It features a precise focusing mechanism and an auxiliary finder scope to ensure ease of use and exceptional clarity. The included robust tripod provides the necessary stability to minimize vibrations, delivering optimal image quality for amateur astronomers and serious hobbyists.

Technical Specifications

Included Components

- White optical tube
- Precise focusing mechanism
- Auxiliary finder scope
- Sturdy tripod

Optical Design	Refractor
Primary Applications	Astronomy, Terrestrial Viewing

Performance

Stability Features

Vibration reduction • Robust construction
