

Astronomical Refractor Telescope with Tripod

This high-powered telescope is designed for astronomical observation. It features a sturdy tripod, adjustable mount, and precision optics for clear, detailed views of celestial objects.

Product Overview

Precision Astronomical Observation

This high-powered astronomical refractor telescope is engineered for clear, detailed viewing of celestial objects. Designed for both amateur astronomers and experienced stargazers, it combines precision optics with a stable platform. The included sturdy tripod and adjustable mount ensure a reliable observation experience under various conditions.

Technical Specifications

Telescope Type	Refractor
Mounting System	Adjustable Mount
Key Features	High-powered optics, Sturdy tripod, Adjustable mount, Precision optics

Usage

Suitable Users

- Amateur astronomers
- Experienced stargazers
