

Astronomical Telescope with Equatorial Mount

This optical telescope is designed for astronomical observations. It features an equatorial mount and adjustable tripod, providing enhanced magnification and clarity for viewing celestial objects.

Product Overview

High-Precision Astronomical Telescope

This astronomical telescope is engineered for clear and detailed observation of celestial objects. It features a robust equatorial mount that allows for smooth tracking of the night sky, supported by a stable, adjustable tripod. Ideal for both novice astronomers and enthusiasts, this instrument combines optical clarity with user-friendly operation to enhance your stargazing experience.
